Proposal

**PROJECT NAME: CITY OF SEABROOK, TX – SANITARY SEWER REHABILITATION PROJECT - 2020
INSTALLATION OF INSITUFORM CURED-IN-PLACE-PIPE (CIPP) & MANHOLE REHABILITATION**

INSITUFORM TECHNOLOGIES, LLC herein proposes to furnish all labor, materials, equipment and services with the noted exclusions, for accomplishing the referenced task.

ASSUMPTIONS AND QUALIFICATIONS

We have based this proposal on a nominal wall thickness for the Insitutube as shown in the price. This is based on the best available information at the time of this proposal. Existing pipe deterioration more than the conditions assumed, ground water loads in excess of those assumed, or other loads or conditions may increase the recommended thickness for all or portions of the work. Final recommendations may be submitted to you following the completion of the preliminary TV phase of the project. Stated prices are subject to adjustment if design changes are agreed upon.

Laterals. During TV inspection all side sewers are verified, using best practical efforts, to determine if each is an active hook up. Normal practice only reinstates those, which are active. You may direct us to reinstate all or specific laterals as you desire. This proposal, unless otherwise stated, assumes that all laterals will be reconnected, and all will be internally reconnected using the Insitucutter. Specific service connections will not be reconnected only when written directions are received from the Owner. The Owner will indemnify and hold **INSITUFORM TECHNOLOGIES, LLC** harmless from all claims arising from backups and other effects of such actions or inactions from services not opened at the owner's request.

Water shall be provided at no cost to Insituform Technologies, LLC for all construction phases of this project. Insituform Technologies, LLC will follow all required deposit, backflow prevention, and metering procedures.

The pricing in this proposal assumes that all Technical Specifications set forth by the City of Seabrook will be strictly adhered to.
